

**POWERVAR releases the 3200 Series Three-Phase (UPS)
at AFCOM's Data Center World Conference in Las Vegas, Nevada**

POWERVAR introduces the 3200 Series Three-Phase Uninterruptible Power Supply (UPS) at Data Center World March 20-21st. The 3200 Series is designed for small data centers and critical load applications. The system's superior design has the smallest footprint in the industry which translates to more data center space for additional computer racks.

The 3200 Series Three-Phase Uninterruptible Power Supply Features include:

- Inrush current capability to withstand up to 300%
- Smallest industry footprint
- Wide input voltage window
- Front and top access for serviceability
- Internal battery monitoring system
- Incorporates paralleling of units for redundancy or capacity

(Show Video)

"The 3200 Series is a very compact design, high efficiency and one that uses the latest technology to be the leader in the 10-40 kVA range while very competitively priced," states Mike Chmura, 3200 Series Product Manager.

POWERVAR has provided the industry with over 25 years of power quality solutions and has developed a full line of power protection equipment with unmatched reliability and quality that is the gold standard of the industry.

POWERVAR will be releasing the **3200 Series** at AFCOM – March 20-21st – Las Vegas (@ the Mirage) Booth #1206.

About POWERVAR

POWERVAR (<http://www.powervar.com>) is a global provider of power management systems, headquartered in Waukegan, Illinois, with international sales and service offices in United Kingdom, Canada, Germany and Mexico. The company's primary products include transformer-based power conditioners and uninterruptible power supplies (UPS), which support a plethora of diverse vertical markets.
