

EU REACH Declaration for Articles

POWERVAR is aware of the EU legislation controlling and restricting certain chemical elements under the REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals) program.

This European Union REACH regulation was updated as of June 2018 adding 10 additional substance to the Candidate List and now contains **191 Substances of Very High Concern (SVHC)**.

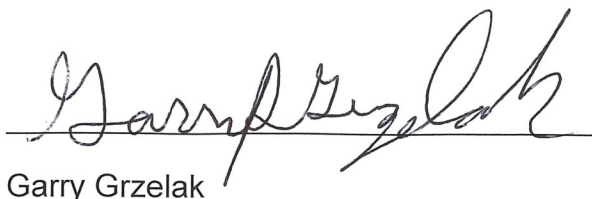

Article 33 of REACH requires supply chain participants to communicate the presence of Substances of Very High Concern (SVHC) over 0.1% by weight in their products. SVHC are identified on the Candidate List by the European Chemicals Agency (ECHA). New SVHC are added to the Candidate List at least annually.

The latest Candidate List of 191 SVHC can be found at the following URL:
<http://echa.europa.eu/candidate-list-table>

We declare to the best of our knowledge and from the information given by our suppliers, our finished products do not contain any SVHC above the threshold of 0.1% by weight per article with the exception of some products containing a battery. Our products which contain batteries will contain the SVHC LEAD (Pb) EC number 231-100-4, CAS Number 7439-92-1.

We will continue to review the current and future additions to the "SVHC list" and will notify our customers when a SVHC substance above the 0.1% level is discovered in our product.
